

Technology Fast 50
Powerful connections

Welcome to the Deloitte Technology Fast 50 Central Europe 2012

The Deloitte Technology Fast 50 in Central Europe is a program that recognises and profiles fast growing technology companies in the region. The program, which is now in its 13th year, ranks the 50 fastest growing public or private technology companies. Technology Fast 50 award winners for 2012 are determined based on percentage fiscal year revenue growth over five years (2007 to 2011).

Revenue growth is calculated in local currency. Companies must meet a minimum revenue threshold (in Euros) in order to qualify. Exchange rates are based on annual average given by the central bank of the company's respective national currency.

The program includes the following related industry sectors:

- Software
- Internet
- Computers and peripherals.
- Telecommunications/Networking
- Media and Entertainment

The Deloitte Technology Fast 50 Program in Central Europe recognises technology companies that have achieved the fastest rates of annual revenue growth in the region during the past five years (2007 to 2011). It is part of the global Fast 500 programme.

Technology companies are invited to self-nominate for the program via our website.

Financial data about the companies is provided by the entrants themselves and is gathered via our online survey tool. This information is then cross-checked using each company's financial statements which have been verified by their accountants or a registered auditor.

For further information regarding the Deloitte Technology Fast 50 Central Europe program, please visit our website: [www.deloitte.com/Fast 50ce](http://www.deloitte.com/Fast50ce).

Introduction

Powerful connections

Each year our Technology Fast 50 recognises companies in Central Europe that live and breathe innovation. These firms based in Warsaw, Prague, Budapest, Bucharest and beyond are serving clients from all around the world in the interconnected global technology marketplace.

The companies on this year's ranking all exhibit the qualities that the Fast 50 has come to embody: embracing change and flexibility; delivering innovative solutions and products; and leading the way in Central European innovation.

Inside this report you will learn about each of the companies on our Fast 50, Rising Stars, and Big 5 rankings. You will also find the results of our annual CEO survey which charts the responses of chief executives from fast-growing technology companies on the issues of confidence, growth scenarios, talent, performance management, and new technologies.

We have had the honour of recognising some of Central Europe's most prestigious and exciting technology companies over the years. I look forward to following the journeys of the companies on this year's ranking.

Marek Metrycki
Fast 50 Programme Leader
Deloitte Central Europe

2012 Technology Fast 50

Rising Star awards

The Rising Star awards recognise high-growth nominating companies who are too young to the Technology Fast 50, but already growing rapidly.

Congratulations to Netwise S.A. from Poland for topping the Rising Star award category this year.

In order to qualify for the Rising Star award category companies must meet the following key criteria:

1. Operating revenues at least €30,000 in each year.
Exchange rates are based on annual average given by the central bank of the company's respective national currency.
2. Must be in business for a minimum of three years but less than five.
3. Must be headquartered within Central Europe.
Subsidiaries or divisions are not eligible unless they have some public ownership and are separately traded.

Rank: 1**Netwise S.A.****Growth: 641%**

Most of the respondents were from the Software sector (54%), followed by Internet (28%) and Telecoms/Networking (10%).

Survey respondents breakdown by business sector 2012

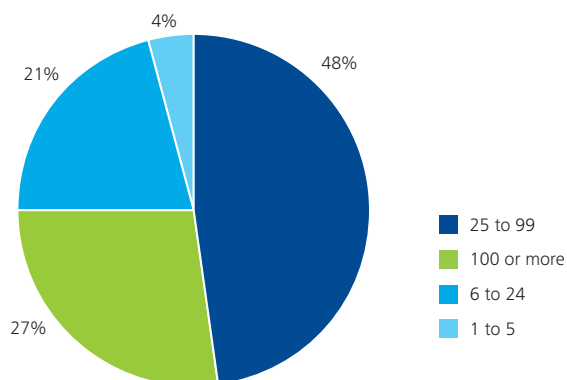

Nearly half of the CEOs (48%) were located in Poland, followed by the Czech Republic (15%) and Hungary (13%).

Survey respondents breakdown by country

Looking at company size, 48% were CEOs from a company with between 25 and 99 employees and 27% from a company with more than 100 employees.

Survey respondents breakdown by company size

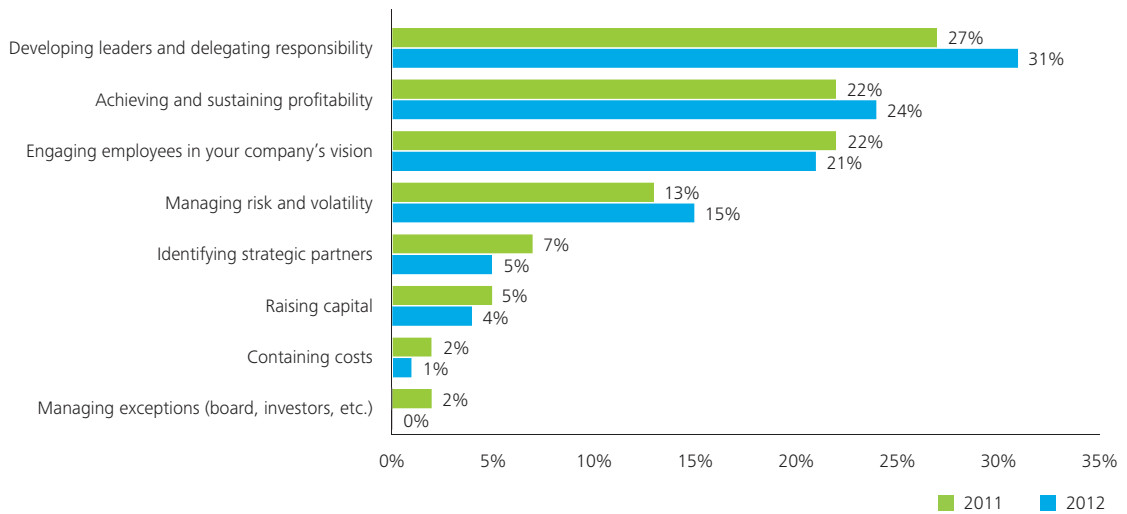

Personal challenge

The biggest personal challenge for 31% of CEOs is developing leaders and delegating responsibility, up from 27% last year. For 24% of them it is achieving and

sustaining profitability and 21% responded that it is engaging employees in the company's vision.

Biggest personal challenge as a CEO

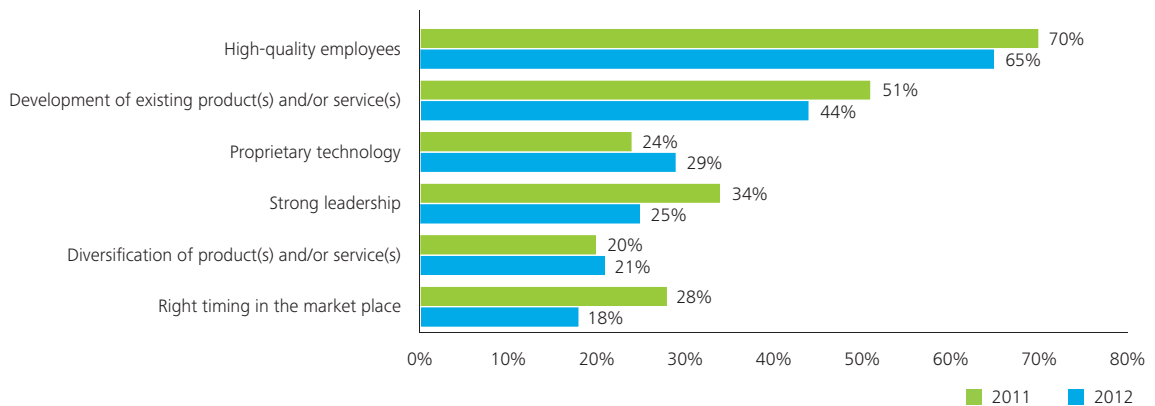

Growth factors and threats

65% of CEOs felt that high-quality employees contributed the most to their growth this year, down from 70% in 2011. Meanwhile 44% attributed part of

their growth to developing existing products or services, down from 51% last year.

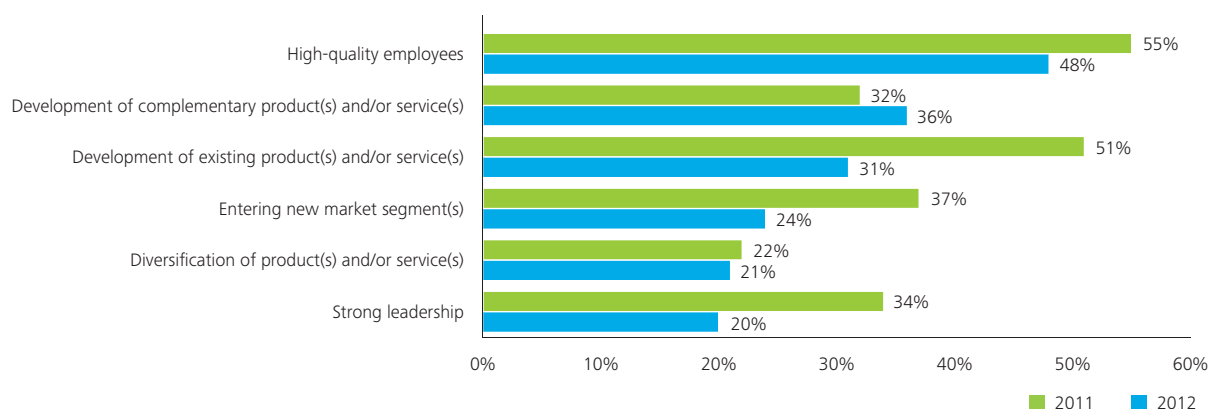

Factors contributing to growth in the previous 12 months

CEOs reported that the most important contributing factor to growth over the next 12 months is high-quality employees, down to 48% from 55% last year.

Fewer CEOs reported that developing existing products or services is a critical growth factor, with only 31% feeling this way compared to 51% in 2011.

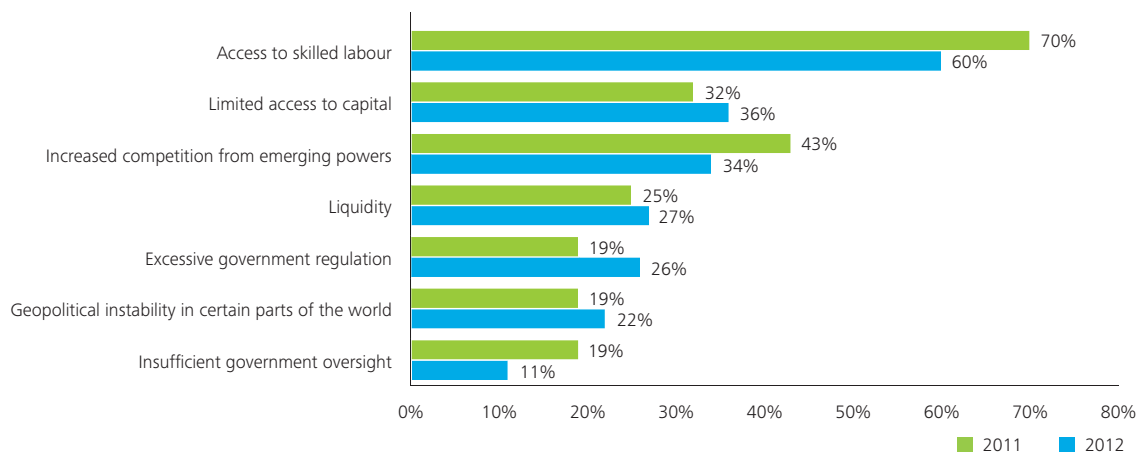

Factors contributing to growth over the next 12 months

The biggest threat to growth remains access to skilled labour according to 60% of CEOs. 36% of CEOs see a threat in limited access to capital, while 34% are wary

of increased competition from emerging powers, down from the 43% who felt this way in 2011.

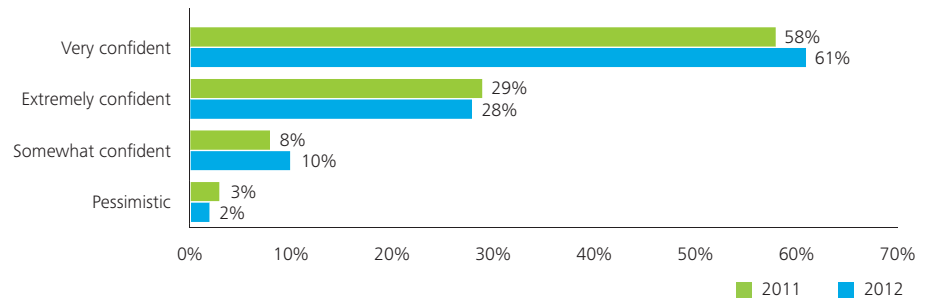

Threats to growth in technology sector over the next 12 months

Confidence level of growth

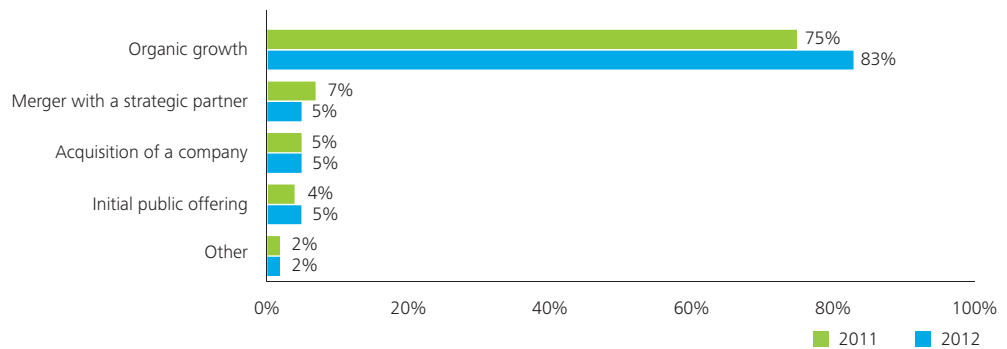

89% of CEOs are either very or extremely confident of growth over the next 12 months: 61% are very confident while 28% are extremely confident.

Confidence level of growth over the next 12 months

Organic growth is the most likely scenario for the company within the next 12 months for 83% of CEOs.

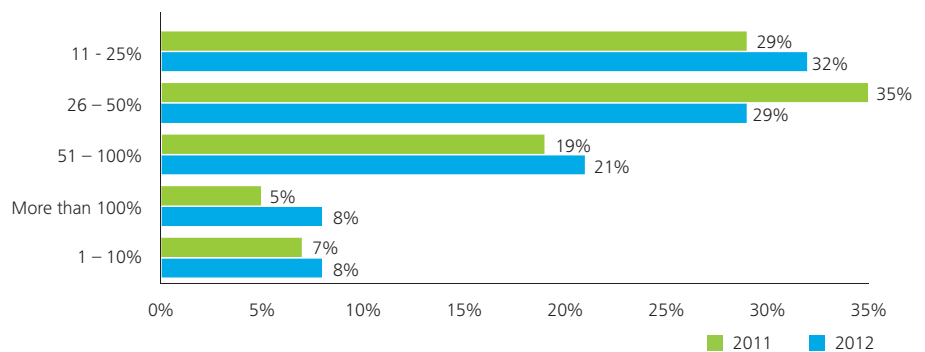

Confidence level of growth over the next 12 months

Expected revenue growth

32% of CEOs expect revenue growth of between 11% and 25%, 29% expect growth between 26% and 50%.

Expected revenue growth over the next 12 months

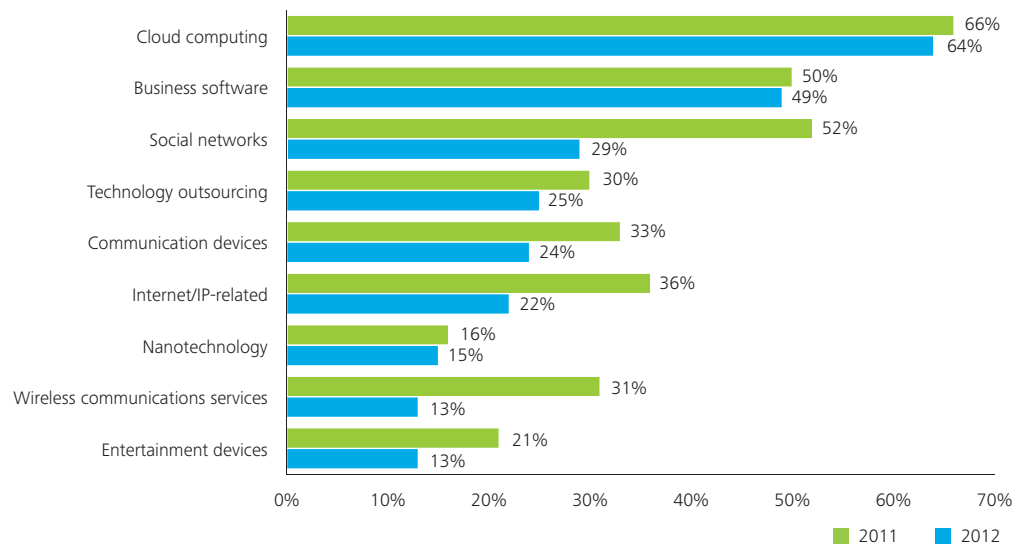

Growth potential

CEOs still expect the greatest growth potential to come from cloud computing, with 64% expressing

this opinion. Only 29% of CEOs see potential in social networks, down from 52% in 2011.

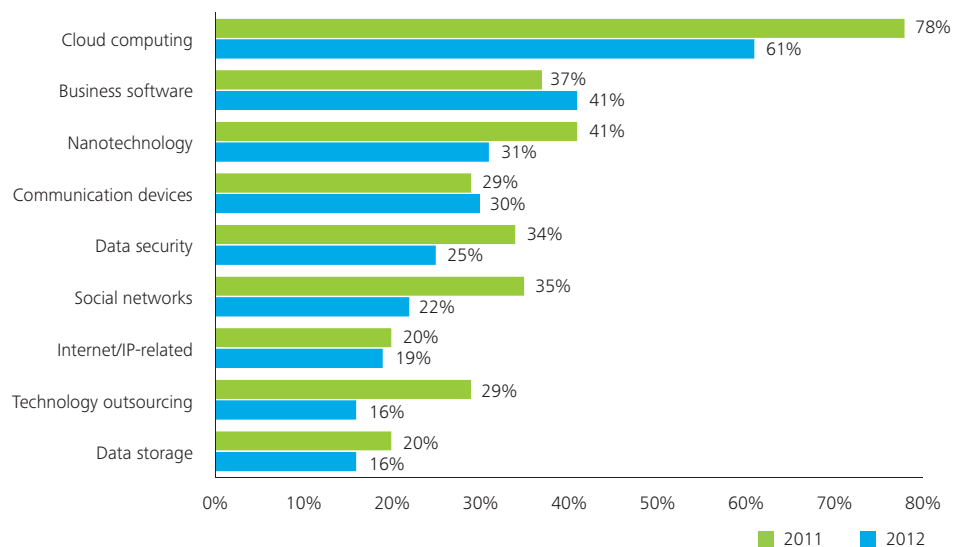

Growth potential of technology sub-segments over the next year

Cloud computing is still viewed by CEOs as having the most potential over the next 1-3 years, though only 61% chose it compared to 78% in 2011. More CEOs are seeing medium-term potential in business software,

which grew by 4 points to 41%. Nanotechnology, meanwhile, is viewed by CEOs as less attractive (31% compared to 41% in 2011).

Growth potential of technology sub-segments over the next 1-3 years

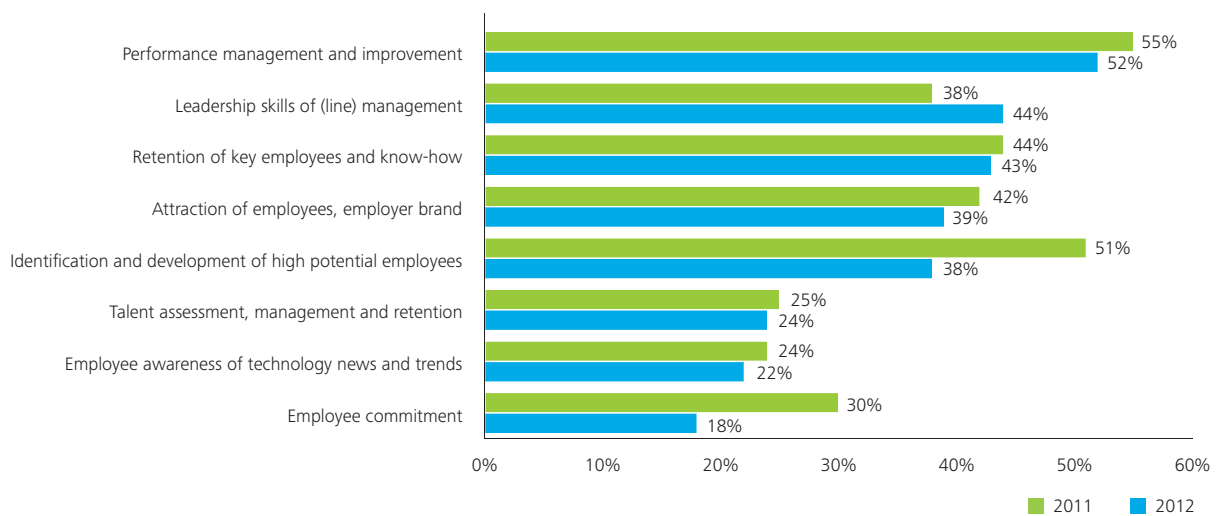

Talent and performance management

The biggest HR challenge for CEOs remains performance management and improvement. More CEOs reported finding leadership skills of managers a challenge.

The identification and development of high potential employees, one of the biggest challenges in 2011 with 51% of respondents, was only selected by 38% of CEOs this year.

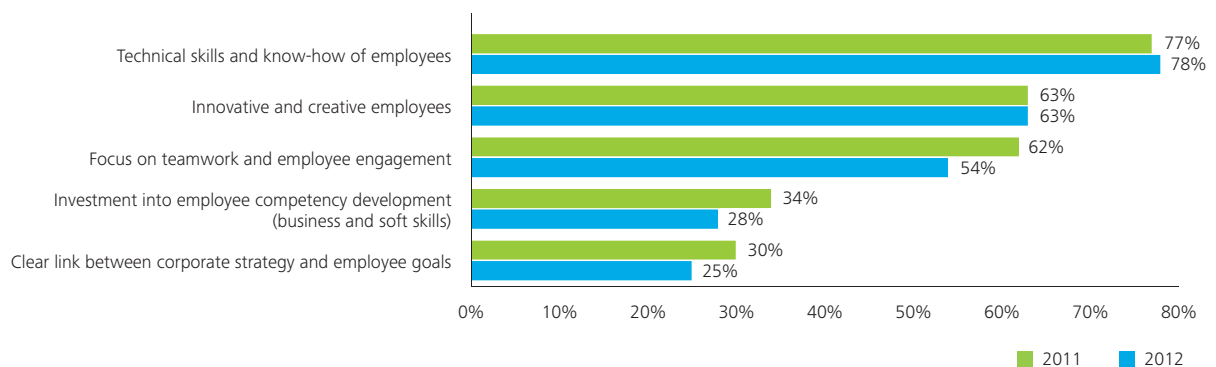

HR challenges as CEO

The top three people-related factors contributing to growth remain the same as last year. Similar to last year, most CEOs (78%) selected technical skills and

know-how of employees as the people-related factor most contributing to growth.

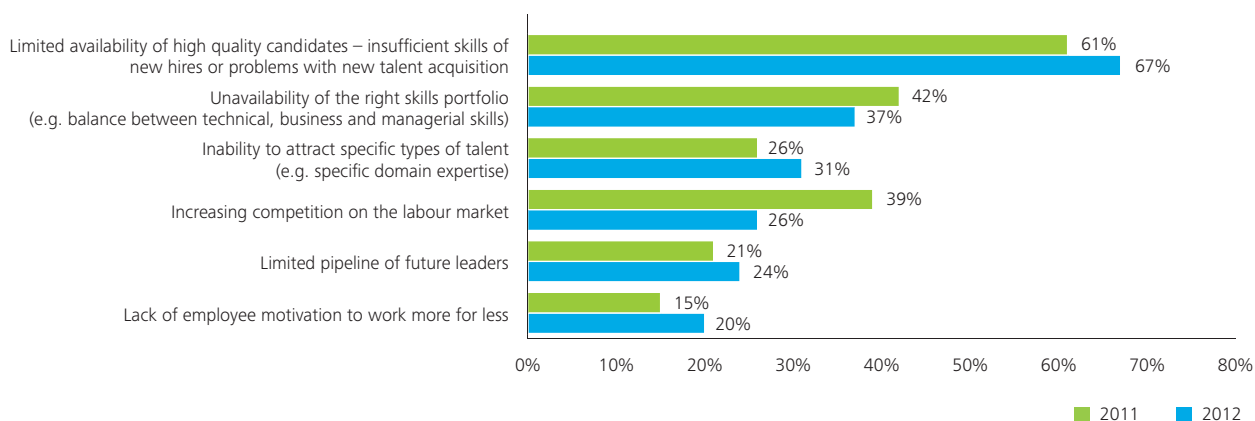

People related factors contributing to growth over previous 12 months

CEOs reported that the biggest people-related threats to growth over the next 12 months will be limited availability of high quality candidates, with

67% expressing this view. Some CEOs see a threat in an unavailability of the right skills portfolio (37%) or in an inability to attract specific types of talent (31%).

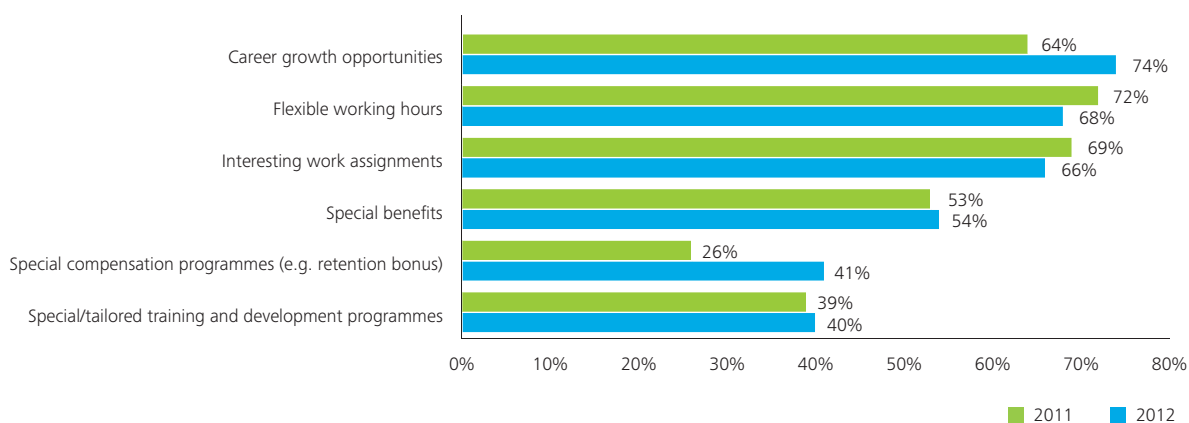

Expected people related threats over the next 12 months

CEOs reported that they attract and retain employees through career growth opportunities (74%), flexible

working hours (68%) and interesting work assignments (66%).

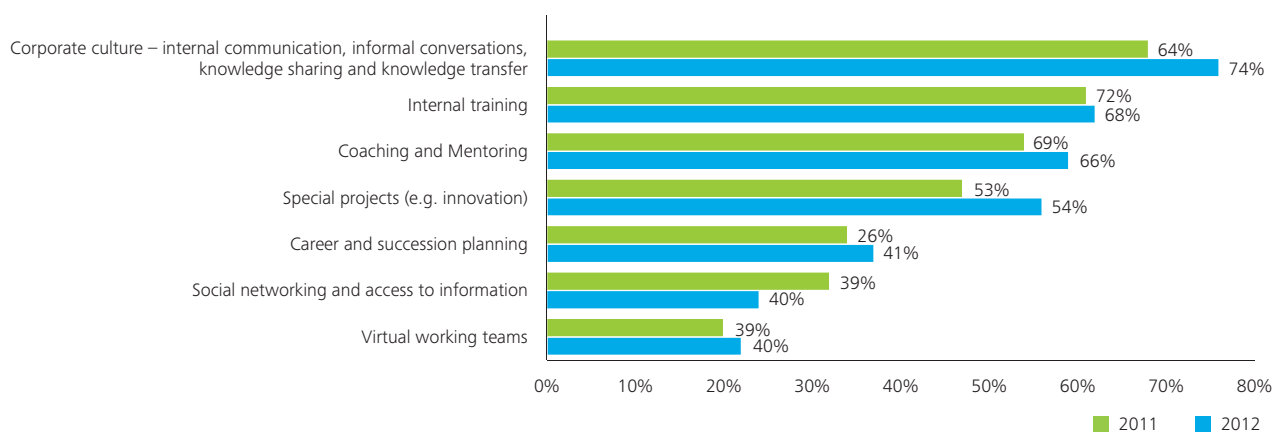

Ways of attracting & retaining employees

The most common activity identified by CEOs to develop their talent was corporate culture, with 76% of respondents expressing this view compared to 68% in 2011. Internal trainings are nearly as common as they

were last year, while more CEOs chose coaching and mentoring (59% over 54% in 2011) and special projects for employees (56% versus 47% last year) as talent-development activities being run in their companies.

"Deloitte" is the brand under which tens of thousands of dedicated professionals in independent firms throughout the world collaborate to provide audit, consulting, financial advisory, risk management, and tax services to selected clients. These firms are members of Deloitte Touche Tohmatsu Limited (DTTL), a UK private company limited by guarantee. Each member firm provides services in a particular geographic area and is subject to the laws and professional regulations of the particular country or countries in which it operates. DTTL does not itself provide services to clients. DTTL and DTTL member firm are separate and distinct legal entities, which cannot obligate the other entities. DTTL and each DTTL member firm are only liable for their own acts or omissions, and not those of each other. Each of the member firms operates under the names "Deloitte", "Deloitte & Touche", "Deloitte Touche Tohmatsu", or other related names. Each DTTL member firm is structured differently in accordance with national laws, regulations, customary practice, and other factors, and may secure the provision of professional services in their territories through subsidiaries, affiliates, and/or other entities.

Deloitte Central Europe is a regional organization of entities organized under the umbrella of Deloitte Central Europe Holdings Limited, the member firm in Central Europe of Deloitte Touche Tohmatsu Limited. Services are provided by the subsidiaries and affiliates of Deloitte Central Europe Holdings Limited, which are separate and independent legal entities. The subsidiaries and affiliates of Deloitte Central Europe Holdings Limited are among the region's leading professional services firms, providing services through more than 3,400 people in more than 30 offices in 17 countries.

Deloitte provides audit, tax, consulting, and financial advisory services to public and private clients spanning multiple industries. With a globally connected network of member firms in more than 150 countries, Deloitte brings world-class capabilities and deep local expertise to help clients succeed wherever they operate. Deloitte's approximately 195,000 professionals are committed to becoming the standard of excellence.
